

Obtaining Your Credentials

① After Evie receives her vaccine, she receives a set of instructions from a nurse on how to set up her vaccine credentials app.

② In addition, Evie receives an SMS with a link to download the app as well as her vaccine credential code.

③ Once Evie downloads the app, she needs to enter her vaccine credential code.

Evie will also need to upload a picture of her personal identification card. Then she will take a selfie. The biometrics system will verify that her selfie matches her ID.

OR

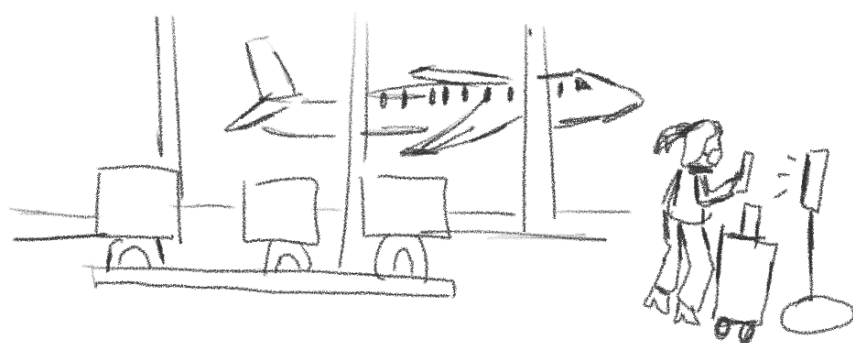

② Since Evie doesn't have a smartphone, she will use the instructions to log online and print off her vaccine credentials.

③ She can also send the credentials to her healthcare company. They will send Evie a card with a QR code and vaccine information that she can keep in her wallet.

Use Cases

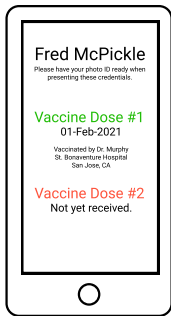

Going on an Airplane (Example of environment with QR code scanner)

① When Evie buys a plane ticket online, she has to enter her vaccine credential identification numbers.

② Evie will have to scan her app or show her credential paper or card when she arrives at the airport when she boards the plane.

Entering public transit (Example of environment with no QR code scanner)

① Before entering a public transit station, you must hold up your credential app or paper showing your credentials.

② The credentials must be visible from 6-10 feet away.
